ThoughtWorks®

We're a global software consultancy solving complex problems with technology. We connect strategy and execution, helping our clients to strengthen their core technology, scale with flexibility and create seamless digital experiences.

From our extensive experience in developing software, we pioneered open-source products that support development teams to create better software. We partner with our clients to continuously evolve their tech and enable an adaptive mindset to meet their business goals.

We are not just implementers.

We are creators, authors (100+ books written), bloggers and speakers who are constantly pushing the state of the art and championing the development of an ecosystem that brings competitive advantage to digital businesses

We are proud to help shape the community by leveraging our learnings and experiences in strategy, advisory and delivery of complex systems to create thought leadership.

BUSINESS IMPERATIVES FOR CHANGE

Data proliferation

Competing horizons

Customer empowerment

Speed and volatility

ACCORDING TO FORRESTER, THOUGHTWORKS APPROACH RESULTS IN

↑ **69%** Improved time-to-benefit

↓ **57%** Reduced cost

↓ **62%** Reduced effort

↓ **80%** Reduced critical defects

↓ **60%** Reduced overall defects

ORGANIZATIONS

Outperform What's Expected.

Build a Technology Organization that consistently outperforms market expectations.

Align your teams to execute brilliantly.

Hire, develop and retain top tech talent and next-level leaders.

Develop an internal capability for change and adaptability to make the seemingly impossible happen.

Build a Technology Organization that can empower customers, manage speed and volatility, competing horizons and data proliferation.

Improve retention of women tech leaders in your Organization.

LEADERS

Unlock Your Full Potential.

Take your teams and organization to a more ambitious, performant and profitable place.

Inspire and bring out the best in your people, always.

Thrive and lead in times of uncertainty, ambiguity, and disruption.

Tackle the most complex and strategic challenges facing your business.

Communicate influentially, purposefully and in ways that connect, build trust, align and drives clarity of vision.

Develop skills necessary to demonstrate the interconnection between technology goals & business priorities.

Develop the mindset, habits and behaviors needed for continuous growth and evolution.

TEAMS

Unlock Your Team's Genius.

Unite in shared purpose and vision.

Amplify trust, alignment, unique strengths and diversity of thought to produce exceptional work.

Develop a learning mindset, new approaches, habits, behaviors and ways of working needed to reach extraordinary performance.

Embrace change and uncertainty, a willingness to challenge the status quo and step into the unknown, together.

Develop a solutions orientation and the ability to work autonomously and cross-functionally more effectively.

Improve adoption and adaptability to new frameworks and methodologies.

Develop resilience.

EXAMPLE INVESTMENT AREAS IN RESPONSE TO COVID

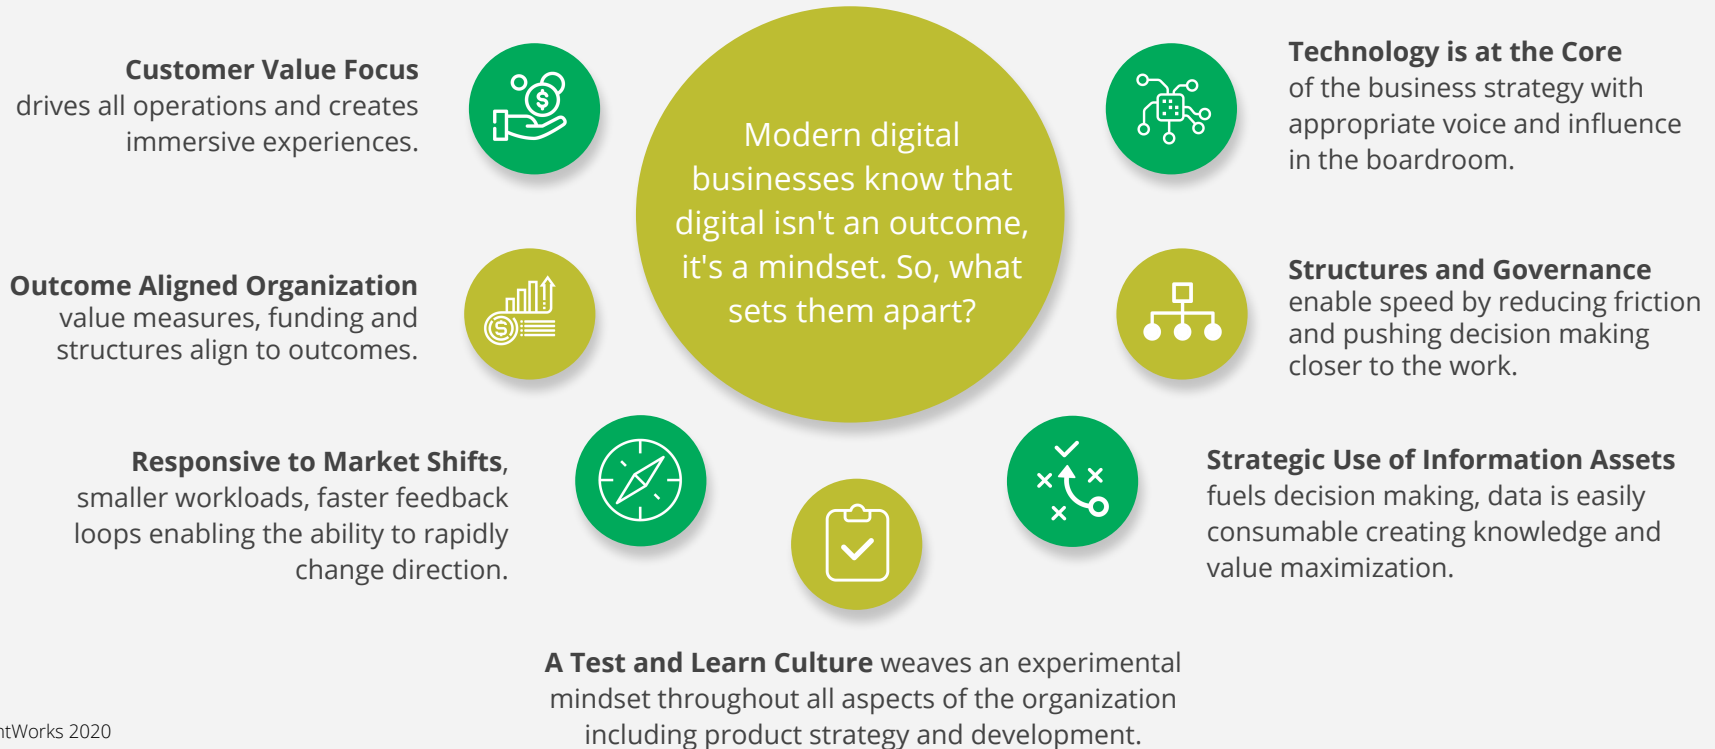

BUILDING A RESILIENT MODERN DIGITAL BUSINESS

The Digital Fluency Model will help you minimize your investment risk, build organizational resilience and accelerate transformation.

KEY CHARACTERISTICS OF A DIGITAL MINDSET

Identify key required investments to achieve your aspiration across all building blocks.

DIGITAL STRATEGIES IN TIMES OF CRISIS

Bold Learning at Scale.

Thriving in the next normal requires accelerating your transformation efforts.

DIGITAL STRATEGIES DURING CRISIS

EVOLVE YOUR BUSINESS PORTFOLIO - M&A strategy to acquire at low valuation, adopt digital technologies early at scale to improve short-term and long-term profitability.

FOCUS ON TIGHTLY INTEGRATED DIGITAL STRATEGIES - Re-evaluate your business and technology strategies more frequently and in parallel. Heavy resource allocation to improve EBITA growth rate.

- What bold digital initiatives or actions have you hesitated to pursue in the past that you know you eventually would be required?
- Invest in entirely new digital offerings
- Use this time while you have a captive audience to experiment,, focusing on usability, data security and scalability

LEVERAGE DESIGN THINKING - Into new offerings to see significant first-move advantage and to grab market share.

QUICKEN YOUR DATA REVIEWS - Define your single source of truth and evaluate the shifting needs of your customers, business partners as well as your own performance.

STRATEGIES TO THRIVE

Treat customer data “differently” now as it is likely not the same as your typical seasonal trends.

Observe changes in consumer behavior across 8 dimensions: Work, shopping & consumption, life at home, learning, travel & mobility, health and wellbeing.

There is an acceleration of past behaviors and new ones.

DIGITAL STRATEGIES DURING CRISIS

REINVENT YOUR BUSINESS MODEL AT ITS CORE - Companies investing in custom software delivery for their IP (secret sauce), taming the beast of SAP, Design Thinking, AI tools, algorithms, Data as product at scale are outperforming their peers. Focus on cost structure pre crisis, during crisis and post crisis.

- Supply chain transparency and flexibility
- Remote workforce automation
- Data security

LEARNING AT THE PACE OF CRISIS - Bold action and strategies and the ability to learn are highly interrelated.

- Use multiple sources of customer data to assess unmet needs weekly
- Dedicate time to learn about digital technologies weekly
- Share test-and-learn findings across organization weekly
- Reallocate digital talent among business units or functions weekly
- Use scenarios to time and size potential shifts in industry economics monthly
- Evaluate portfolio for opportunities to add/divest business in light of digital
- Evaluate profit pools based on competitive-landscape shifts
- Reallocate CAPEX expenditures across BU's
- Use Lean Value Tree to defund underperforming initiatives
- Begin with customer facing initiatives, use automation and predictive analytics to isolate opportunities, standardize your tools

STRATEGIES TO THRIVE

Customer behavior changes will reshape consumer decision journeys including how the consumer gets information, what they purchase and where.

Be sure you are addressing basket re-composition, hierarchy of needs, format polarization, brand-preference re-evaluation.

A photograph of three people in a meeting, overlaid with a teal-to-yellow gradient. On the left, a woman with glasses is seen in profile, looking towards the center. In the middle, a woman with short blonde hair is seen from the back, looking at a whiteboard. On the right, a man in a striped shirt is leaning forward, looking at the whiteboard. The whiteboard is covered with numerous sticky notes and a hand-drawn diagram. The diagram includes a box labeled 'Key Objectives' at the top, with several arrows pointing to it from below. Other sticky notes contain various text fragments, some of which are partially legible, such as 'INTEREST', 'CONNECT WITH PEOPLE', and 'MANAGEMENT'. The overall scene suggests a collaborative work environment.
